MEMORANDUM FOR: Deputy Director for Science and Technology
Director of ELINT
Director of Research and Development
Director of Special Activities
Director of Computer Services
Director of Special Projects
Director of Foreign Missile and Space
Analysis Center

SUBJECT: Draft DD/S&T Training Program

1. Attached is a suggested draft curriculum for a one-year DD/S&T training program. Also appended thereto, as Tabs A through J, are brief descriptions of the content of those courses which will be conducted by DD/S&T components. Comments from addressees are solicited by 1 June.

2. The program, as presently outlined, is designed for fully cleared personnel and would start on 1 August. It would cover a full year including two weeks for leave, one week each at Christmas and the end of the course. Although set up for [redacted] students, a more realistic number for this year probably would be [redacted]. If each of the Offices provided at least [redacted] students and OSI supplied perhaps [redacted] this number could be achieved.

3. As you will note, a detailed breakdown of the segments of the course allocated to NSA, AFTAC, NPIC and OTR is not included in the attached material. It was considered desirable to delay asking for their input until the times to be allocated and other details were agreed upon.

4. Following is a summary of the course by major topics:

a. Standard intelligence orientation - 2 weeks
(Required by the Agency for new employees. Useful to set the stage with regard to the community and how it is organized.)

b. Modern developments in R&D - 13 weeks

c. Computers and computer programming - 5 weeks
(depending on background of students)
